

GET ARMED WITH Abate®

HOW TO FIGHT DENGUE EFFECTIVELY

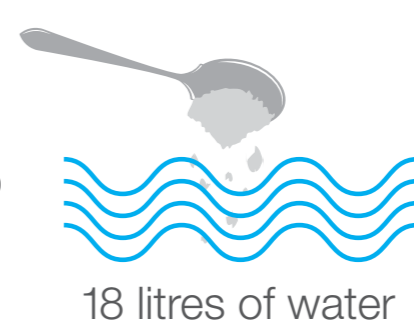

IN ORDER FOR THE USE OF **ABATE** TO BE EFFECTIVE,
WE MUST TAKE NOTE OF THE FOLLOWING:

Abate is to be used in conjunction with regular inspection to identify potential mosquito breeding areas.

2 gram of
Abate 1 SG

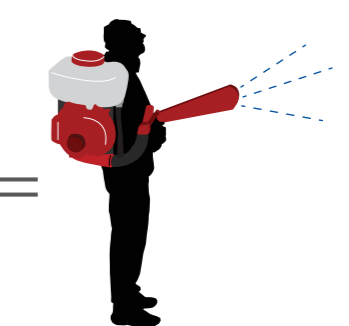

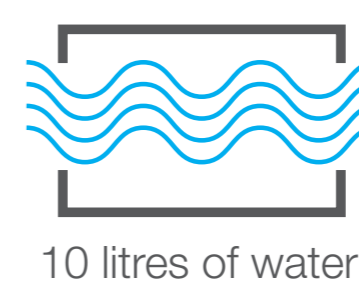

into

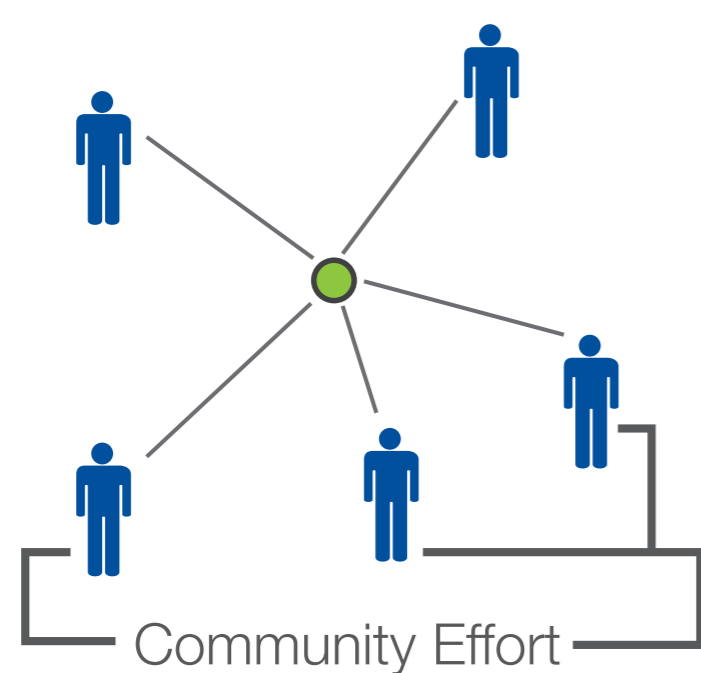

Application of **Abate 1 SG** is 18 litres of water (rate per hectare is 10kg or 1 gram per square metre)

10 ml of
Abate 500E

+

Application of **Abate 500E** is to dilute in 10 litres of water (spray volume per hectare is 100 ml).

Abate application is not for individual use, it should be a community effort together with strong commitment from the authorities, industries and pest control operators.

Dengue mosquitoes inhabit in places where there are people and industry activities. We must be alert in identifying potential breeding grounds of Aedes mosquito and destroy them immediately.

**REMEMBER DENGUE IS CONTROLLABLE IF WE HAVE A
TIME-TESTED AND EFFECTIVE LARVICIDE SUCH AS ABATE**

In Singapore,
Abate is distributed by:

BASF
The Chemical Company
